

Placer County’s 8th annual STEM Expo is fast approaching!

Rocklin, CA, February 19, 2018

On Saturday, March 3, elementary and high school students from around the region will compete in Placer County’s 8th annual STEM Expo. This exciting and free one-day event features Science, Technology, Engineering and Mathematics (STEM) in an innovative alternative to the typical county science fair. The Expo gives students a place to exhibit their work alongside interactive exhibits, entertainment and fun learning opportunities for the entire family.

This year, Placer County STEM Expo is proud to announce Shobha Mallarapu - President and CEO of Anvaya Solutions Inc. and recipient of the 2017 Enterprising Women of the Year award- as our keynote speaker.

A student entry in STEM Expo is often the first step leading to recognition as one of the top young innovators in California. With seven exciting categories to choose from, students are able to focus on their interests and talents. Categories include: Invention & Reverse Engineering, Science Fiction, Infernal Contraptions, Computation & Robotics, Intelligence & Behavior, The Physical Universe and Living Things. Certificates and awards are presented in all of the seven categories.

In addition, STEM Expo judges will advance six students to represent Placer County at the California State Science Fair (CSSF) in southern California (April 24-25, 2017) Thanks to our sponsor - JetBlue - these students will receive roundtrip ticket vouchers to attend this event.

STEM Expo, a non-profit 501(c)3 corporation, is fast becoming recognized as the model for the next generation of student science competitions and many locations around the country are replacing their traditional science fairs with our format and concept to help get their students excited about STEM.
